

## Francesco Giuseppe Leccese

Date of birth: 27/12/1986

Address: Via Generale Dalla Chiesa 24/a - Bari(ITA)

Mail: [franekdev86@gmail.com](mailto:franekdev86@gmail.com)

Phone number (ITA): +39 327 096 3560

*Front End Developer* and *Doctor in Marketing and Business Communication* with six years of experience working in an ICT company and 2 years of programming experience. I have completed my Bachelor's Degree in Marketing and Communication at "Università degli Studi di Bari" (Faculty of Economics and Commerce) and attended 1000+ hours coding bootcamp to learn new markup and programming languages while sharpening existing skills. I would like now to apply my knowledge and passion for coding to a talented engineering team to develop quality solutions. Enjoy working closely with team members to ensure workloads are effectively redirected to bottlenecks and personally picking up the slack when necessary. With passion for both personal growth and for web development.

## Work Experience

**01/2023 - ongoing**

**FRONT END DEVELOPER** (freelance)

My portfolio webpage: <https://franekdev-portfolio.netlify.app>

My github profile: <https://github.com/Franek-86>

- Create, build, and maintain your websites and web applications.
- Focus on aesthetic factors like layout, user interface and other visual imagery in order to make your website more visually appealing and easy to use.
- Deep care of the overall style of your app combined with the focus on the actual functionality and usability of your application.
- It's possible to view my latest work on my "projects" page from my portfolio website, you can reach it by clicking [here](#) or by going to the following path <https://franekdev-portfolio.netlify.app/projects>.

**12/2023 - 06/2024**

**FRONT END DEVELOPER** internship at **Developing.it** (Bari - Italy)

- Working in teams with a backend developer I have been fully in charge of creating the front-end interface of companies management systems built with Laravel.
- Working in teams with other front end developers I collaborated in developing several Wordpress websites, all of them built with custom PHP templates.
- Fully in charge of the creation of a client website, from start to finish, built with a custom Wordpress PHP template and working with the most advanced Wordpress functionality.
- Fully in charge of the creation of a client website created from start to finish with Wordpress Elementor.
- Fully in charge with the front end creation of the company internal “smart office” full responsive web application. This is an application used for opening gate, main door, set boiler temperatures and others. I created the front-end side of this web application using React.

**08/2022 - 12/2022**

**IT CUSTOMER SERVICE TEAM MANAGER** at **Fujitsu** (Łódź - Poland)

- Coordinate the service desk team members in their daily duties of attending to clients who come to make inquiries and facilitate good customer service culture in team members
- Evaluate and assess service delivery performance metrics and carry out survey on clients to weigh the level of service delivery in the company
- Keep record of daily operations at the desk for tracking of customer needs, services rendered and future reference
- Create a mode of operations to be adhered to by team members in order to maintain good routine and orderliness
- Delegate specific service desk responsibilities to team members to create specialization and increase service delivery pace
- Review all client complaints, rectify issues and liaise with appropriate departments to handle complex issues in a bid to provide more effective solutions
- Observe service desk operation techniques to determine how effective they are and implement new techniques when old ones are ineffective
